# HOW TO CREATE A PAPER PLANE THAT WILL TRAVEL A FAR DISTANCE

First you fold the two sides in half like this.

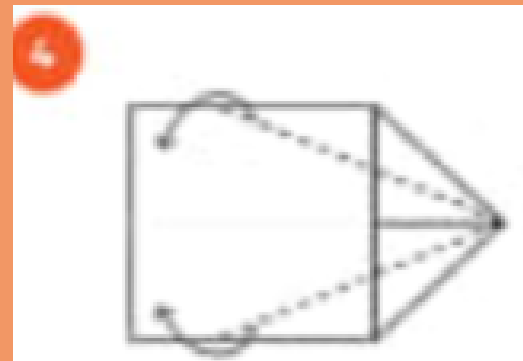

STEP 2

**Next you open the paper and then fold the other corners so that they are resting on the middle line.**

STEP 3

after u have folded the corners fold the paper half agian and make sure every time when u fold to press it hard agisnted the table or any hard surface.

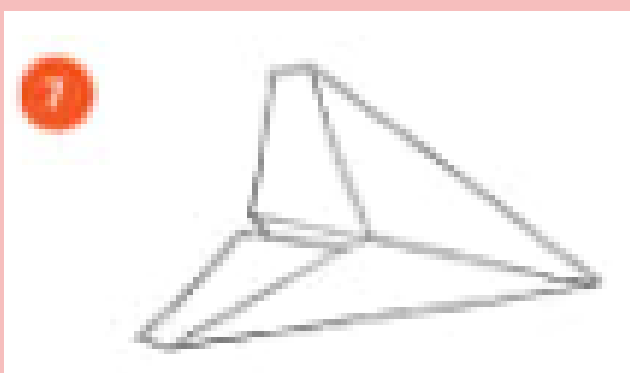

STEP 4

once its on its side u have to fold the wings.

FINAL STEP

make sure to know that the sharper the tip is the faster its going to go.
